Lesson 15 Habitat and Species

Lesson 15 Habitat and Species									
Step	Action								
1	<p>Note: Projects related to Habitat and Species are created in the same way as any other project. This guide does not go through the entire project entry process; it just goes through the additional steps required to enter a project related to Habitat and Species.</p>								
2	<p>When creating the objectives, select the New Purpose/Target button to identify the habitat(s) and/or species targeted by the objective.</p> <ul style="list-style-type: none">Enter the Purpose/Target ID, name and description. Remember the Purpose/Target does not describe the actual objectives, but instead describes WHY the objective(s) are needed and the affected species/habitat(s). <div><div>SMART Objectives</div><div><div>+ New Need/Threat</div><div>+ New Purpose/Target</div><div>+ New Objective</div><div>Inherit fr</div></div><div><div>Properties</div><div>Habitat</div><div>Species</div><div>Viability</div></div><div><div>Purpose/Target ID</div><div>1</div><div>*</div><div>?</div></div><div><div>Purpose/Target Name</div><div>St. Vrain River Habitat Restoration</div><div>*</div><div>?</div></div><div><div>Purpose/Target Description</div><div>*</div></div><div>Improving the St. Vrain Riverine habitat will protect water quality and improve habitat for a variety of species, including the endangered Greenback Cutthroat Trout.</div></div> <ul style="list-style-type: none">Fill out the Habitat tab if applicable. Select from the drop downs the Habitat type 1 and 2. Click Add Selected Habitat to add it to the list (repeat as needed). <div><div>SMART Objectives</div><div><div>+ New Need/Threat</div><div>+ New Purpose/Target</div><div>+ New Objective</div><div>Inherit from Plan</div></div><div><div>Properties</div><div>Habitat</div><div>Species</div><div>Viability</div></div><div><div>Broad Habitat Type 1</div><div>RIVERINE</div><div>?</div></div><div><div>Broad Habitat Type 2</div><div>River</div><div>?</div></div><div><div>+ Add Selected Habitat</div></div><div><table><tr><th>Habitat</th><th>Level</th><th>Directly Benefitted?</th><th>Controls</th></tr><tr><td>River</td><td>2</td><td><input checked="" type="checkbox"/></td><td></td></tr></table></div></div>	Habitat	Level	Directly Benefitted? Step	Action
2 cont.	<ul style="list-style-type: none"> Fill out the Species tab if applicable. Use the Edit Selected Species button to add or edit the species.  <p>Note: Species information is pulled from the Integrated Taxonomic Information System (ITIS). This list does not currently include additional species search options (such as local names for species or names in other languages).</p> <ul style="list-style-type: none"> On the Species Selection window, use the Specific Search tab to look up species by common or scientific name. Click the plus sign on the right to add each species to the selected items box on the right.  <ul style="list-style-type: none"> Use the Taxonomic Search tab to lookup a taxonomic group (use plus sign on left to open each menu). Select the taxonomic level (e.g. genus) and enter the name in the search field. Click on the + sign on the left to expand the menu and select the level to add. Click the plus sign on the right to add each species/group to the selected items box on the right (and use the minus sign to remove them if needed). Then click Ok.
